

## CASTLE BIOSCIENCES, INC

### AUTHORIZATION FOR STORING BIOSPECIMEN FOR POSSIBLE FUTURE USE

#### What you should know about the Castle Clinical Sample Repository

- This form explains the purpose of the sample repository and your option to utilize it.
- Please read it carefully.
- Providing a sample for storage with this repository is optional. You can choose not to provide this sample.
- You may decide to cancel this authorization at any time. If you cancel, we will destroy your stored sample and any associated information.
- You will not own any product or idea associated with Castle Biosciences Inc., the holder of your stored sample.

#### **Purpose of the Castle Clinical Sample Repository (CCSR)**

As an added service to patients for whom DecisionDx-UM gene expression profile testing is performed, Castle Biosciences offers to store an extra frozen biopsy sample for your potential use in the future.

#### **Procedures**

It is important to understand that this ***is not a research study***. This sample will ***not*** be used by Castle Biosciences for research purposes, or for any other purpose. Castle Biosciences will not disclose the sample or any associated information to any third party, except as requested in writing by the patient and his/her physician. Castle Biosciences will simply store the sample. This additional sample will be collected at the same time a sample for DecisionDx-UM testing is taken, and will be beyond that which is required in order for our test to be performed. You should discuss the risks and benefits of the collection procedure with your physician.

The specimen will be stored in a repository in a -80C freezer located in a standard approved laboratory setting. The stored sample will be maintained for a period of 5 years, at the end of which time it, and any associated information, will be destroyed. The sample will be accessible only by the patient from whom the sample was taken, upon written request from the patient and his/her physician. A ***Release of Material Authorization*** will be obtained from the patient and his/her physician prior to Castle Biosciences' releasing the sample.

Castle Biosciences reserves the right to discontinue this program at any time for any reason. Every reasonable effort will be made to notify you prior to the termination of this program, should it occur. Upon any termination of the program, the patient's sample and any associated information will be destroyed.

There is no cost to patients to store this extra sample. However, there may be cost associated with providing this sample to the appropriate party upon the patient's and physician's request, such as shipping costs. It is not possible to know the amount of such costs, which may be charged to the patient at the time a sample is requested. Before Castle Biosciences ships the sample in response to the request, Castle Biosciences will notify the patient of the associated cost.
